Claim Rejections - 35 USC § 101

35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

Claims 19,20,33 are rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter. Claims 19,33 positively set forth the fiber as contacting the vasculature of a patient thereby including the patient as part of the claimed invention. The inclusion of part of the part in the claimed invention renders the claims as being directed to non-statutory subject matter.

Claim Objections

Claims 2-4,7,9-10,13-14,19-20 are objected to because of the following informalities: In claims 2,9,13,19, it is unclear as to what structure has been positively set forth in order to further limit the previous claim. In claims 3,7, "the optical fiber" lacks antecedent basis. Appropriate correction is required.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 34,35 are rejected under 35 U.S.C. 102(b) as being anticipated by Kittrell et al (5,199,431). The claims are directly readable on Kittrell et al which discloses an optical fiber catheter having at least three lumens used to detect reflected light signals to determine vessel or blood characteristics. With respect to claim 34, the structure set forth is not given any weight in the method claim unless used in a manipulative sense.

Allowable Subject Matter

Claims 2-4,7,9-10,13,14 would be allowable if rewritten or amended to overcome the objections set forth in this Office action.

Claims 1,5,8,11,12,15-18,21,32,44-46,48 are allowable over the prior art of record.

Response to Arguments

Applicant's arguments filed July 18, 2007 have been fully considered but they are not persuasive. With respect to claim 34, the specific structure of the apparatus set forth is not used in a manipulative sense and therefore, it is not given any weight in the method as set forth.

Conclusion

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
